SUMMARY

Motivated and detail-oriented Software Engineering graduate with a strong passion for **Full Stack Web, Mobile, and ERP system development**, and a focus on delivering intuitive user experiences. Graduated with a BSc (Hons) **Second Class Upper** Division, specializing in building responsive, scalable, and production-level applications. Experienced in developing and delivering **15+** production grade projects across web, mobile, and ERP domains, transforming complex requirements into reliable, high performance solutions through clean code, system design, and collaborative teamwork.

EDUCATION

BSc (Hons) in Software Engineering
second class (upper division)
University of Plymouth
2022-2025

Aquinas College
English Diploma
(2021-2022)

G.C.E. A/Level (commerce)
Siri Piyarathana College
2020-2021

WORK EXPERIENCE

Cozy Hub Digital

Full-Stack & Mobile Developer

september 2025 - Present

- Developed and maintained scalable **web, mobile, and ERP** applications using modern technologies and best practices.
- Designed and implemented secure backend services, RESTful APIs, and efficient database solutions.
- Led end-to-end development activities, from requirements analysis to deployment and ongoing support.
- Collaborated with cross-functional teams to deliver high-quality software solutions in Agile environments.
- Successfully delivered **15+ production level projects**, ensuring performance, scalability, maintainability, and an excellent user experience.

TECHNICAL TOOLS

- Programming Languages:** Python, JavaScript, TypeScript, C, C#, PHP, Dart, Kotlin
- Frontend Development:** HTML, CSS, React.js, Next.js, Angular, Tailwind CSS, Material UI, jQuery
- Backend & Databases:** Node.js, Express.js, MongoDB (MERN Stack), MySQL, Supabase, Firebase
- Mobile Development:** Flutter, Dart, Kotlin (Android)
- Tools & Platforms:** AWS, Firebase, Twilio, Nodemailer, Git, GitHub, Postman, Docker, Figma

SOFT SKILLS

- Communication
 - Teamwork
 - Adaptability
- Problem-Solving
 - Creativity
 - Critical Thinking
- Time Management
 - Attention to Detail
 - Leadership

CORE PROJECTS

Vaccine Baby – Baby Vaccination Management Web Application (Final Year Project)

- Developed a web application to help parents manage child vaccination schedules with automated reminders. Implemented secure authentication, personalized timelines, and real-time growth tracking with a scalable, user-friendly design.
- **Technologies:** React.js, Node.js, Express.js, MongoDB, Firebase Storage, Material UI, Twilio, Nodemailer.

Furniture Visualization web App (Group)

- Built a web app for designers to visualize furniture in real-time 3D rooms, enabling accurate scaling and style previews to improve customer decisions.
- **Technologies:** Technologies: React, React Three Fiber, JavaScript, 3D Modeling

BookNest – Full-Stack Library Management System (Group)

- Built a role-based system with admin, librarian, and user portals. Features include book reservations, damage reports, real-time updates, and secure deployment with CI/CD.
- **Technologies:** React, Node.js, Express, MongoDB Atlas, JWT, AWS S3, WebSocket, Docker

Green Supermarket – Java-Based E-commerce Platform (Group)

- Developed a web-based shopping system with secure payments, user accounts, cart checkout, and SMS/email notifications. Included admin and customer interfaces.
- **Technologies:** Java Swing, JSP, Servlets, MySQL, PayPal API

ADDITIONAL PROJECTS

- **walawwa residencies:** High end hospitality web solution.
- **saloon management system:** Comprehensive appointment and staff tracking tool.
- **RemindGPT:** AI driven reminder and scheduling application.
